VISION - *Quality products, Quality services and Quality sales are the vital components of our business vision.*

MISSION - *The dedication to quality, achieve an unparalleled reputation for total customer satisfaction are the company mission.*

OBJECTIVE - *A commitment to achieving profitable growth whilst maintaining and enhancing a reputation for quality, to the benefit and sincerity of our principals and customers is our target and will remain to the next century.*

LIFETIME MECHANICAL WARRANTY :

WIESS USA warrants that its products are free from defects in materials and workmanship. This warranty is limited to the lifetime of the door on which our product is installed. In the event our product does not conform to this warranty,

WIESS USA will repair or replace the product free of charge. This warranty does not cover defects or damage arising from improper installation, lack of or improper maintenance, improper storage, shipping and handling, ordinary wear and tear, misuse, abuse, accident, unauthorized service, or use with unauthorized parts. We reserve the right to make changes in materials, components or manufacturing methods. Liability under all warranties expressed or implied is limited to replacement of the defective goods. This warranty does not cover nor provide for the reimbursement or payment of incidental or consequential damages.

LIFETIME FINISH WARRANTY :

WIESS USA warrants its "ZG" finish to the original user against tarnishing as long as occupies the residential premises upon which the product was originally installed. This warranty does not cover scratches or abrasion, abused or misused products or products used in commercial applications. Upon return of a defective product to **WIESS LOCK**, we will at its sole discretion, either replace the product or refund the purchase price in exchange for the product. This warranty does not cover nor provide for the reimbursement or payment of incidental or consequential damages arising from the sale of its product.

Options

ANSI GRADE 1 SERIES MORTISE LOCKS HEAVY COMMERCIAL/ INSTITUTIONAL/ INDUSTRIAL

Specifications: ANSI A 156.13, Grade 1, UL Listed, 3 hour fire rating
A115.1 door preparation
Handing: field reversible

(2-3/4" backset)

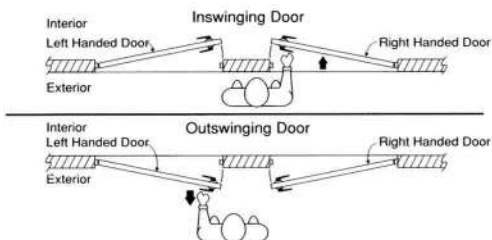

Handing of Doors

How to Determine the Handing of a Door:

- The hand of a door is always determined by facing the OUTSIDE of a door.
- If the hinge is on the left side of the door, the door is left hand (LH).
- If the hinge is on the right side of the door, the door is right hand (RH).

To order a handed product, specify LH or RH.

Not all products are handed; only specify handing when required.

How To Order Example

LOCK SERIES	FUNCTION	TRIM DESIGN	FINISHES	OPTION

(Please see Lever Gallery for other lever Style)

LOCK SYSTEM

CYLINDER

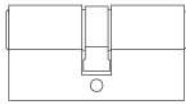

Terminology

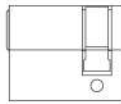

Locking cylinders are categorized according to:

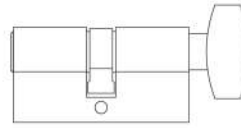

Profile cylinder

Double cylinder

Half cylinder

**Thumbturn cylinder
WC thumbturn cylinder**

The definition of important components and characteristics of locking cylinders in this catalogue follows generally the terminology according to **EN 1303** with **DIN 18252/09-1999**.

Security pass

General requirements on locking cylinders are defined in the **EN 1303** and **DIN 18252/09-1999** standards. These standards categorise locking cylinders into three grades which define the following characteristics:

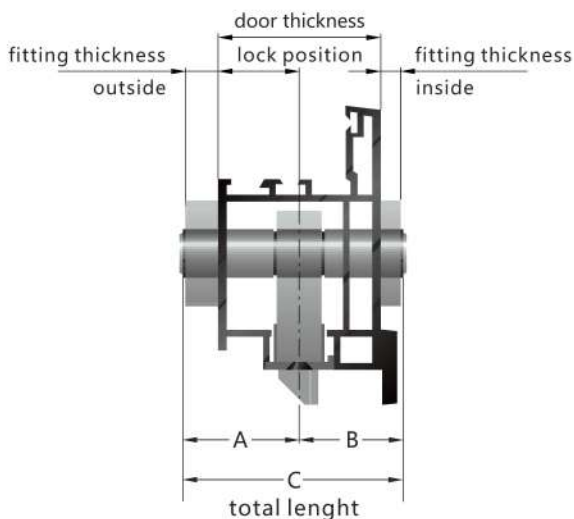

Minimum number of pin tumblers:

Grade 1 and 2: 5 pin tumblers,
grade 3: 6 pin tumblers

Minimum numbers of different key changes:

Grade 1 and 2: 30000 key changes,
grade 3: 100000 key changes

Determination of the cylinder length:

The following factors have to be considered when determining the length C of the locking cylinder:

- . Door thickness
- . Position of the lock in the door
- . Thickness of fitting on the outside
- . Thickness of fitting on the inside

Note:

- . The lengths A and B are each measured from the centre of the fixing screw.
- . The following applies to the length C: The cylinder must protrude only max. 3 mm from the fitting on the outside and inside.

Euro-Mortise Lock Series

An innovative new lockset.

Changing Lock Hand (standard)

If it is necessary to change hand of latchbolt

1. Insert blade type screwdriver into square hole behind latchbolt
2. Push latchbolt out until back of bolt clears lockbody front
3. Rotate latchbolt 180° until the latchbolt drops back into the lockbody

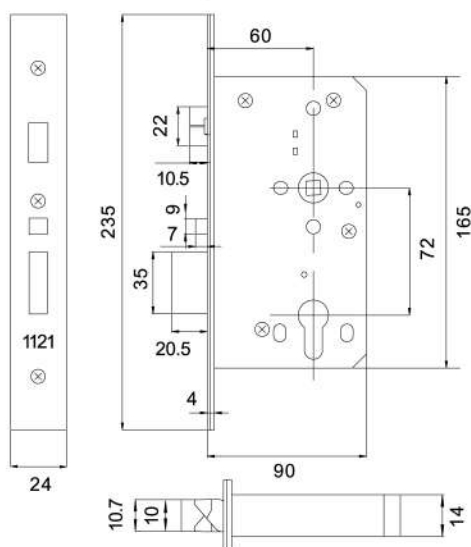

Door Handing

To determine the handing of a door face the OUTSIDE of the door.
If the hinge is on the left side of the door, the door is left handed.
If the hinge is on the right side of the door, the door is right handed.

DOOR HANDS DETERMINED FROM OUTSIDE

72-60TD European Profile Electrified Mortise Lock

SPECIFICATION

- Compliance: BS EN12209:2003
BS EN1709 :2008
- signal output: A)LBM (Latchbolt Monitor): a SPDT switch that monitors the full extension of the main latch.
B)REX (Request to Exit Monitor): a SPDT switch that monitors the activation of the free lever. Used for shunting alarms, releasingelectromagnetic locks, or monitoring egress.
- Lock state: Locked when power off/ open the next power off
- Input voltage: 10-18V
- Output current: 200mA
- Power: 12.5W
- DoorThickness:45-50MM standard. Optional 51-70MM
- Backset: 55/60MM
- Finish: SS, PVD PS

Function:

- Non handed
- Applicable door: steel door
- Application: Security and retracted accss areas
- Optional: master key

PTD200, Power Transfer Device

Material: stainless steel 304

DL02

Push Button

Dimension: 86x86x25.7MM
Input volt: DC 12V
Current: 50mA
Electrical character: 1A@30V DC, 0.5A@125V AC
Contact output: NO/NC/COM
MAX working distance: 4-10CM, adjustable,
LED status indicators

STAINLESS STEEL EUROPEAN MORTISE LOCKCASE

SPECIFICATION: Entrance Lockcase

E800

5572 / 6072 / 6572 / 7072 / 8072

Case: Stamped steel, 1.5mm thick, Zinc plated,

165mm x 85/90/95mm x 15mm

Front plate: SUS304 stainless steel 3mm thick,
front standard size is 235mm x 24mm in square-end
(round-end for optional).

Latch: SUS304 stainless steel, 13mm throw, reversible

Deadbolt: SUS304 stainless steel, 20.5mm (max.)

double throw projection.

Follower: lever support springs on square 8mm spindle.

Backset: 55mm / 60mm / 65mm / 70mm / 80mm available.

Applicable: wooden door / steel door

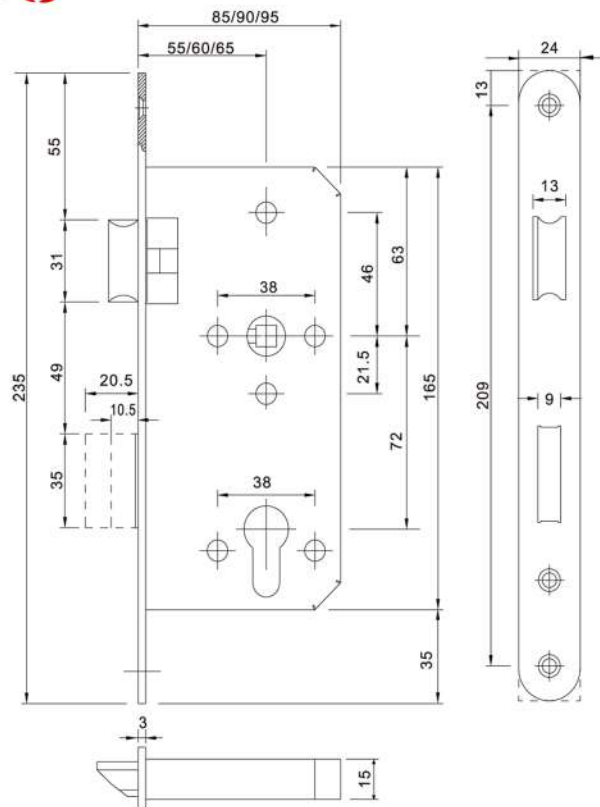

Handing: non-handed, field reversible

Finish: Satin stainless steel (32D)

Lockcase prepared fitted for Euro-profile cylinder and standard fixings.

Function: Latch by lever both side. Deadbolt by key outside or thumb turn inside.

Standard: Certified by EN12209 & EN1634-1, 4 hours fire rated

SPECIFICATION: Bathroom Lockcase

P800

5578 / 6078 / 6578

Case: Stamped steel, 1.5mm thick, Zinc plated,

165mm x 85/90/95mm x 15mm

Front plate: SUS304 stainless steel 3mm thick
front standard size is 235mm x 24mm in square-end
(round-end for optional).

Latch: SUS304 stainless steel, 13mm throw, reversible

Deadbolt: SUS304 stainless steel, 20.5mm, single

throw projection.

Follower: lever support springs on square 8mm spindle, the second square 8mm spindle below for privacy set.

Backset: 55mm / 60mm / 65mm available.

Applicable: wooden door / steel door

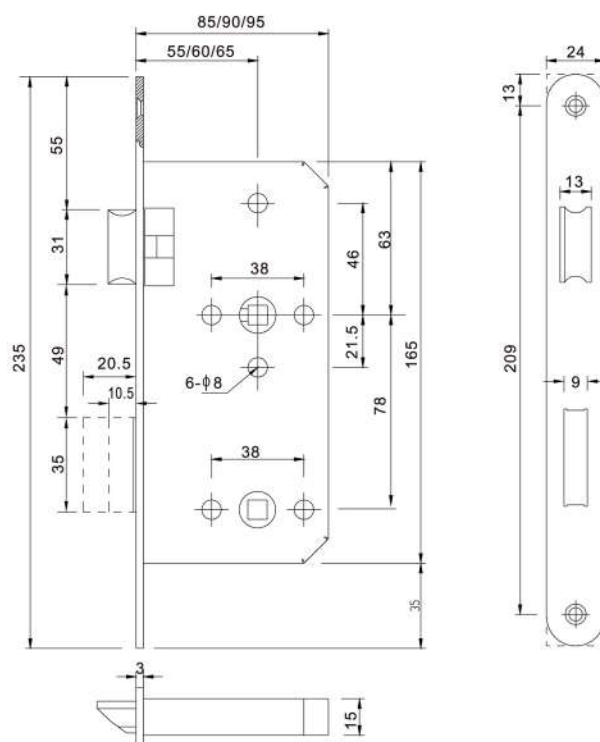

Handing: non-handed, field reversible

Finish: Satin stainless steel (32D)

Lockcase prepared fitted for standard fixings.

Function: Latch by lever both side. Deadbolt by emergency release outside or thumb turn inside.

Standard: Certified by EN12209 & EN1634-1, 4 hours fire rated

SPECIFICATION: Exit Lockcase

E800T

HEAVY DUTY CYLINDRICAL TYPE KNOBSET

This heavy duty cylindrical knobset designed for commercial and residential markets. The heavy duty cast mounting plate with specially tapped holes keep lockset tight on door. All performance specifications conform and meet with ANSI A 156.2 Series 4000B, Grade 2 Lock. It is the choice for your home security.

Lock Specification :

> Latch Bolt -

1/2" (13mm) bolt projection latch furnished with all locks, solid stainless steel latch nose.

> Strike -

Brass, Bronze or Stainless steel curved lip with dustbox (standard). Full-lip ASA strike (Option).

> Roses -

Adjustable both sides, made by Brass, Bronze or stainless steel. 75mm diameter roses (Standard) 80mm diameter roses (Option).

> Front -

Brass, Bronze or Stainless steel 2 1/4" x 1"

> Backset -

2 3/4" (70mm) latch (Standard).

> Door Thickness -

1 3/8" (35mm) to 2" (52mm) Standard.

> Standard Finish -

Polished brass - US3 (ANSI 605)

Satin brass - US4 (ANSI 606)

Antique brass - US5 (ANSI 610)

Antique Copper - US11 (ANSI 616)

Polished stainless steel - US32 (ANSI 629)

Satin stainless steel - US32D (ANSI 630)

> Handing -

Non-handed, Field reversible.

> Cylinder -

Solid brass, Schlage 6-pin C keyway standard.

> Internal Mechanisms -

Steel, double treated with plating and chromate conversion coating to resist rust.

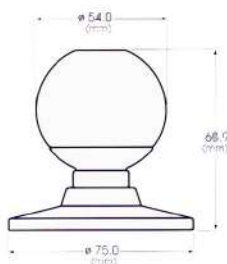

> Knobs Dimension -

54mm diameter knobs (Standard),

58mm diameter (option).

How To Order Example

LOCK SERIES FUNCTION TRIM DESIGN FINISHES OPTION

WA 82PD APO / 3 ML

Door Preparation

- 2¹/₈" (53.97mm) diameter face hole and 1" (25.40mm) diameter latch hole.

Latches

- 2³/₈" (60.32mm) to 2³/₄" (69.85mm) Adjustable backset latch standard with Welcome Home products.
- Spring function and deadlocking function latches are available in square, 1/4" (6.36mm) radius, and drive-in faceplates.

Keying

5 Pin "E" Keyway standard. 5 pin "C" Keyway plugs optional. Additional keying options include: Keyed Alike, Master Keyed, Construction Keyed, Block-o-Keyed, Grand-Master Keyed. All cylinders have brass plugs and state-of-the-art self-lubricating Delrin housing providing a lifetime of smooth key operation. Standard front removable cylinders.

Strike Plate Dimensions

A	2 ¹ / ₄ " (57.15mm)
B	7/8" (22.22mm)
BX	1 ³ / ₁₆ " (30.16mm)
C	1 ⁵ / ₈ " (41.27mm)

Other strike options are available.

Functions

Dummy Trim: Single knob, wood screw mounting.

Dummy Trim Set: Two knobs with threaded shanks. Mounts with threaded stud that engages both knobs.

Passage Lockset: Non-locking knobs inside and outside.

Connecting Exit Set:

Dead-locking latchbolt with knobs inside and blank plate outside.

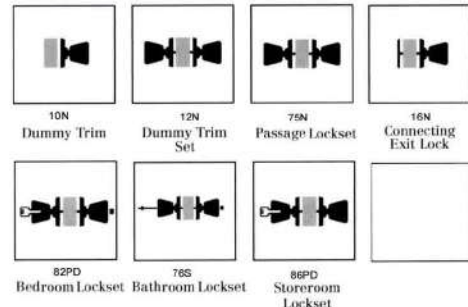

Patio Lockset: Both knobs locked by turn button in inside knob; deadlocking latch standard. Exterior knob not keyed.

Bathroom Lockset: Push-and-turn button locks interior and exterior knobs. Emergency release hole in outside knob.

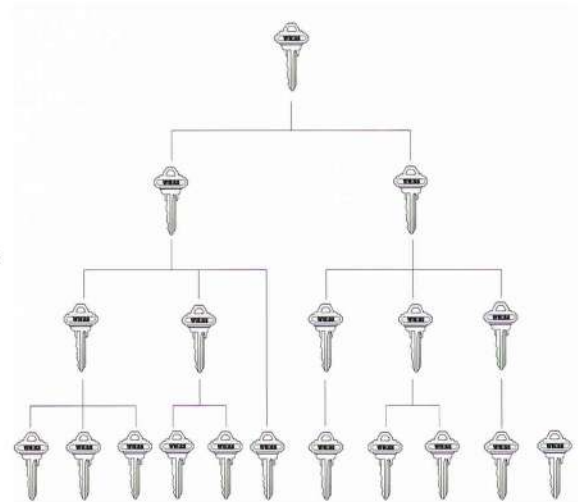

Bedroom Lockset: Keyed knob outside. Turn button locking inside. Deadlocking latch.

Storeroom Lockset: Keyed knob outside. Outside knob always rigid, inside knob always free. Deadlocking latch.

Functions

MASTER KEYING SYSTEM

ANSI
CODE

F75 Passage

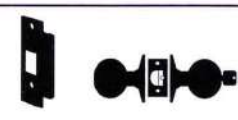

Latch by knob either side.

ANSI
CODE

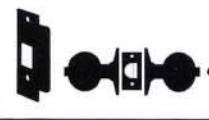

F86 Storeroom

Latch by knob inside, key outside. Outside knob always locked.

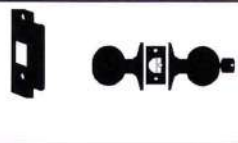

F76 Privacy

Latch by knob either side unless outside knob locked by push button from inside. Outside unlocks by turning inside knob, or outside emergency turn or closing door.

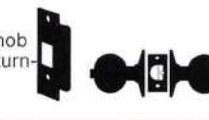

F84 Classroom

Latch by knob inside. Outside knob locked or unlocked by key.

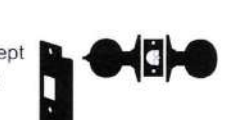

F77 Patio

Latch by knob either side unless outside knob locked by push button inside. Unlocks by turning inside knob or closing door.

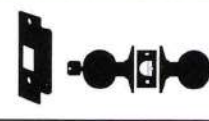

F83 Exit

Deadlocking latch by knob either side except when outside locked by turn button inside. Inside knob always opens latch.

F80 Communicating

Key both knobs. Locks or unlocks either knob independent of the other.

Dummy Trim

Outside only, rigid.

F81, F82 Entrance

Outside locked by pushing turn button inside. Key outside opens lock. Rotating inside knob releases button and outside lever. By pushing and turning inside button, outside knob remains locked.

CONTROLLED EXIT PANIC DEVICE IN STAINLESS STEEL

This heavy duty rim type touchbar controlled exit panic device with a rugged, full stainless steel construction. It provides superior performance in meeting high standard of quality and reliability. It is designed and manufactured in accordance with international standard. - CE & UL Listed "Controlled Exit Panic Device". Tested in accordance to ANSI A156.3, 1984, Grade 1 Lock.

SEMI LENGTH TOUCHBAR - CMP001S

Specification :

> Exterior Trim -

Trim: Grade SUS304 stainless steel assemblies.

Latch: Grade SUS304 Solid stainless steel.

Head: Grade SUS304 Solid stainless steel.

> Dimension -

Overall length: 1045mm

Touchbar: 500mm (length) x 45mm (height).

> Standard Finish -

Satin stainless steel - US32D (ANSI 630)

> Handing -

Non-handed

> Performance -

Tested in the specifications of ANSI A 156.13, Grade 1 Lock, UL Listed and CE Label

Low opening pressure (under 5 daN) is ideal

for children, old people or handicapped.

Device operates in panic situation even if door

is subjected to load 100daN

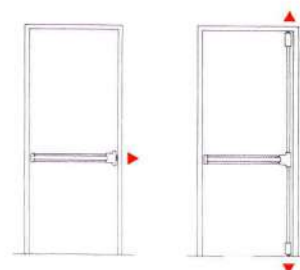

Deadlocking latch and bolts for greater security.

> Outside locking device -

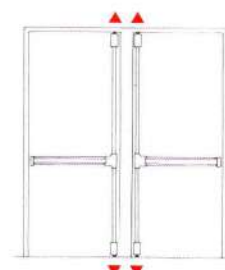

Lockable outside attachment, independent of touchbar.

> Alternative installations -

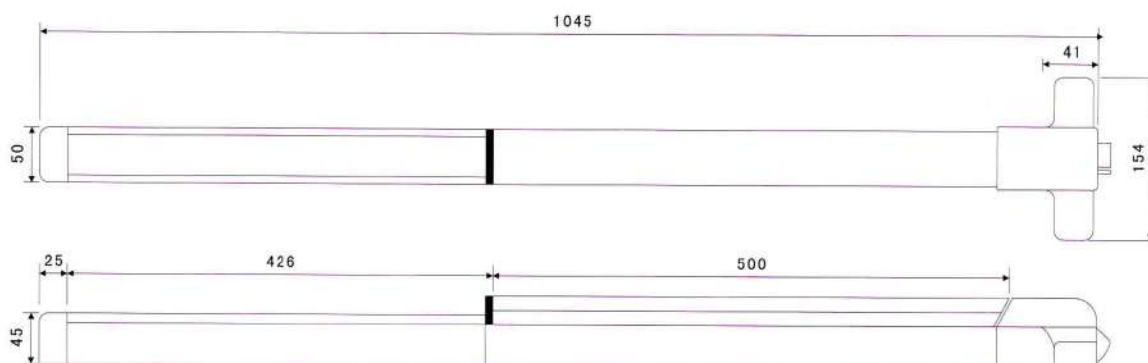

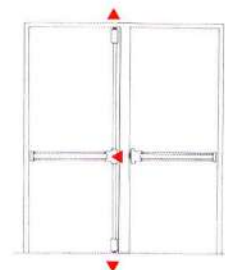

Single door

Double swinging doors

Double rebated doors

CONTROLLED EXIT PANIC DEVICE IN STAINLESS STEEL

INTELLIGENT SMART CARD DIGITAL DOOR LOCK

☞ **MORE RELIABLE !**

☞ **HIGHER SECURITY !**

☞ **GREAT CONVENIENCE !**

☞ **MORE USER FRIENDLY !**

- > 50 sets of fingerprint operation in general users
- > 5 sets of fingerprint operation in master users
- > 50 sets of Password operation in general users
- > 5 sets of Password operation in master users
- > Prevention of password disclosure
- > One-touch opening (Anti-panic)
- > Electric shock protection
- > LED display window
- > Low power consumption
- > Alarm warning for invasion
- > Warning for PIN error
- > Voice guidance for low battery
- > Master control mode selection
- > Hotel mode multi-level operation
- > Dual locking
- > Automatic re-locking
- > Emergency power supply source
- > Deadbolt protection
- > Emergency mechanical key provided

THE IC CARD LOCK has the higher ratio of function to price , adopts German Siemens encrypted card with high security and durability as key card. Advanced five-latch mortise lock. Picklock-proof and deadbolt inside function. Match with the management software make hotel's management more vivid, convenient and safe.

THE SERIES OF RF CARD LOCKS

Stainless steel precision casting series:

Cover is made of 304 stainless steel, so it will never be oxidized or corroded, it is applicable for using in Beach Resort, Cruises and Buildings beside the coastal cities. (for mortise, stainless steel latch is optional)

INTELLIGENT LOCKS FUNCTION

Mechanical key override: The separate emergency mechanical structure will allow the unlocking by the mechanical key in emergency.

The lock memorizes the latest more than 200 access records to be checked for case, guarantee the security management. The access records are collected by the data register.

Panic release function: Deadbolt and latch are automatically retracted by pressing the inside handle for easy egress.

Anti-pick function: when close the door, the anti-pick latch will prevent the lock to be picked.

Alarm for not closing well. When the door is not closed well and the latch is pressed, the lock will give alarm (suitable for ANSI mortise) to remind the guest and the waiter to close the door well.

Card recycle use: Card can be use recycle (one hundred thousand times), to save the environment and the cost. Card can be printed with AD design, such as hotel pattern, helps to promote the hotel.

Multi-purpose card can be developed from the keycard, to support lock system, power system, safe, lift, hotel consumption system, and so on.

SERIES OF ENERGY-SAVING SWITCHES

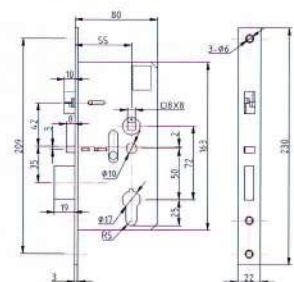

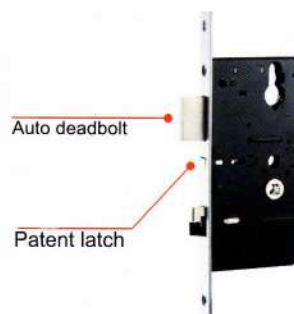

When entering the rooms, the guests have to insert the room card into the Energy-saving Switch to turn on the illumination system. While leaving the room, the guest draw the room card; then the power supply will be shut off by the Energy-saving Switch about 15 seconds later. The delay function is very important in the Energy-saving Switch, without it, the guests have to leave the room in the dark. The consumption of the illumination system in each room in the hotel is about 2000 wait. If the guests forget to turn off all the electric appliances when they leave the room, which will be a great waste and it's very insecure. So we specially developed the Energy-saving Switch for the hotel to save the substantive regrettable consumption.

9908 When insert card of any type to the Energy-saving Switch, the power on. When draw the card, the power will be off 15 seconds later. Working Voltage: AC110V/220V; Load Working Current: 30A; No-working Situation: Indicate in red; Cover Material: PC

0308 only insert the siemens 4442 or compatible IC card to the Energy-saving Switch to get power. When draw the card, the power will be off 15 seconds later. Working Voltage: AC 110V/220V; Load Working Current: 30A; No-working Situation: Indicate in red; Cover Material: PC

0309T Only insert the RF card(Temic, EM card 0309M is for mifare card)to the Energy-saving Switch to get power. When draw the card, the power will be Off 15 seconds later. Working Voltage: AC 110V/220V; Load Working Current: 30A; No-working Situation: Indicate in red; Cover Material: ABS;

Note: Other voltage can be ordered. (Such as AC110V, DC12V, DC6V, etc.)

INTELLIGENT LOCKS FUNCTION

Superb reliability and Low running cost: Stand -alone lock is powered by 4 AA\AAA alkaline batteries. Low power consumption (the batteries can last for 10-24 months), high reliability and low maintenance help to keep the running costs low.

Keycards are limited by lock's clock, when the guest's lodging is out of the deadline, the keycard will be invalid, so the guest has to take the card to renew.

Keycards are grouped into several levels to make the access authority clear. There are Master Card, Building Card, Floor Card, Waiter Card and Guest Card. Hotel managers can modify the authority of each card according to actual need at any moment.

Normal-open state can be set for meeting: typically used for conference rooms the door will then remain open after reading a valid keycard until the card is inserted\ouched again.

Avoid waiter's incautious disturb: If the guest draws out the deadbolt inside the room. when insert\ouch keycard(except Master Card) the LED will flash in red and green alternately to remind the waiter that someone is inside the room.

Report the loss of keycard: Even if your keycard is lost, you can keep quiet, the lost keycard can be invalidated by simple card operations on the lock.

The lock memorizes the latest more than 200 access records to be checked for case, guarantee the security management.

The elegant printed card help accent the distinction of the hotel.
Multi-purpose card can be developed from the keycard, to support lock system, power system, safe, lift, hotel consumption system, and so on.

User-friendly and Compatible software: Specially utilize a WINDOWS software platform to design the management software make use easy. Offers software interfaces(DLL)to make the lock management software can be connected to other hotel management system. Can be linked with micros FIDELIO system.

HUNE Intelligent lock software can work in both stand-alone mode and client-sever mode. In client-server mode, many computers can issue cards and inquire information at the same time.

SERIES OF INTELLIGENT SAFES

129-B

- 1-9 digit optional password.
- Different lever password management.
- High bright screen display.
- Locked for 3 minutes after 3 times error password.
- Outlet for external battery case.
- Mechanical key for emergency.
- Unlocking record for case (optional).
